THIS COULD BE YOU!

The simple fact is when somebody needs a service... What they do is use their phone and type in a search like "plumber" and ring the first or second plumber which appears on their phone. This is just the way it is now! People's phones use location services and people just type in the kind of business they want and the suburb and phone the searches which appear. With google AdWords we can make you appear to your local audience.
